

Date

To the Honorable:

Governor Rick Perry  
Lieutenant Governor David Dewhurst  
Commissioner of Education Michael Williams  
State Board of Education chair Barbara Cargill  
Senate Education Committee chairman Dan Patrick  
House Education chairman Jimmie Don Aycocock  
Members of the Texas Senate and Legislature

The most concerning thing about last November's Presidential election was not the outcome, but that almost 60 million people thought reelecting Barak Obama was a good idea. How did a man who openly supports unfettered abortion, homosexual marriage, record setting deficit spending and the redistribution of earned wealth garner the support of nearly 60 million voters? The reason: That is what the voters have been taught in an educational system that is controlled by supporters of the Federal Government.

Beginning with LBJ's Elementary and Secondary Education Act, the Federal Government began an unconstitutional power grab over public education.

Then in 1991, President George H. W. Bush tied American education into the standards set by the *United Nations Education Scientific and Cultural Organization*.

Since then, every few years the Federal government rolls out the latest version of the same old UN standards. Whether you call it *Goals 2000*, *No Child Left Behind*, *Race to the Top*, and *Core Curriculum* it's the same old junk and America keeps buying it. And although we have rejected the *Core Curriculum* in Texas, the CSCOPE curriculum, coupled with willful non-compliance with the Texas Education Code and SBOE-adopted standards, is leading us in the same direction.

The Founder's design was for local control of education. Unfortunately, the school busses in my town still say "\_\_\_\_\_ Public Schools", but they really aren't. They are the local branch of an educational system controlled by those who support the destructive curriculum of the Federal Department of Education. We voluntarily have sold our freedom for the sake of funds that come from a bankrupt government, that forces conservative, God fearing Texas children to abide by the federal curriculum which is birthed by UNESCO with the intent on creating a "sustainable" earth without borders.

We have kicked God out of school and replaced Him with Darwin and Marx. If there is no God, then government is the grantor of all rights including my Obamaphone and Obamacare.

That is why American Exceptionalism is no longer taught, but evil American Imperialism is. Rather than teaching our kids to be thrifty, hardworking and self-reliant, they are taught government dependency.

Since God doesn't exist, there is no absolute truth and consequently right and wrong has been replaced with tolerance and intolerance. We are taught that Islam is good and Christianity is bad. We are not taught to be good American citizens (as our founders demanded), rather we are taught to be global citizens. We are taught about "rights", but we aren't taught responsibility. We aren't taught that no one has a right to do wrong.

Out of control curriculum such as CSCOPE may be the most dangerous Trojan Horse that has yet been brought to Texas, for the following reason.

With the new push toward *Common Core Curriculum*, and its little brother CSCOPE, the ACT and SAT tests are adjusting to reflect those same standards. All text books will then conform to these new standards as even "homeschool" and "private school" will be forced to be taught to the test.

If we do not stop this program now, it will become America's next Medicare or Social Security and millions of children will be lost inside a one size fits all system to create equal mediocrity among the new "global citizens."

Let's restore American exceptionalism, and reject CSCOPE and the general contempt for the TEC and SBOE-adopted standards. We're smart enough to make decisions about our own children and our own schools. Texas is in a leadership role as the most conservative state in our country. If we lose the public education battle here, America is finished.

Let us, once again, teach our students to be proud to be Americans.

Sincerely,
